

My name is **Shawn**. I am a computer science graduate who has been working for over 5 years in the web development industry, primarily as a php, javascript, and actionscript 3.0 developer.

I have had primary roles in graphic production, graphic design, and multimedia production at my previous jobs. I am an expert in Photoshop with 10 years of experience, and I am proficient and knowledgeable when it comes to video production or even audio engineering. Please view my [web portfolio](#) for samples of my web work.

I'm an amateur photographer, a musician, an environmentalist, and politically active.

YOU ARE A COMPANY:

- That cares about its employees as people.
- That is set on providing its services professionally and honestly with quality as the bottom line rather than profit
- That is not set on financial and global domination
- Is made up of a team that cares about it's cause
Who knows that you can't decide to only be sick the allotted 3 or 5 days in a year

I AM:

- Someone who has lived web development for the last 5 years
- Someone who will bring creativity and forward thinking to projects
- Passionate about planning and doing things right from the beginning
- A strong advocate of following workflow and web standards and following their trends
No stranger to deadlines, multitasking, and 40+ hour weeks.
